EXPERIENCE

Present
Metasearch Technology

Developed Frontend sites for Metasearch Technology. Lead implementation of best practices for multiple projects while working for 3+ teams. Trained and Managed three contract web developers and two offshore developers. Worked within an Agile team of UX Designers, Marketers, Product Managers and Software Engineers to implement/ migrate 60+ major consumer facing search sites.

[Microsoft MVC3, Razor for ASP.Net, HTML, CSS, JavaScript, JQuery, XML]
Infospace, Inc.

2009
Real-time Vessel Tracking

Designed, developed and implemented a vessel tracking system. With team work, client relation and communication, I helped the project processd to Phase II. I am also honored to have an impact on how the client will use this application, from tracking vessels to saving lives.

[HTML, CSS, JavaScript, AJAX, ASP.NET, and SQL Server 2008]
Integral GIS, Inc.

2009
Renewable Energy Dashboard

Design and created a usability enhancement for the client's web portal. I helped develop the first web driven dashboard for the dotCom department which further helped them realize the full potential of their data, from displaying only a PDF to displaying a dynamic user friendly map using ArcGIS Server JavaScript API.

[HTML, CSS, JavaScript, ASP.NET, and ESRI ArcGIS Server JavaScript API]
Integral GIS, Inc.

2009
Political Analysis

Working collabratively with our client to design, develop, and implement simutaniously, 3 designs that served the various stakeholders of the elections process in Lebonon. My UI design was chosen from a slew of designs because of the clean, simplistic, innovative, and user friendly appeal. I am privilaged to have had the opportunity to work abroad, further developing my skills.

[Silverlight 3, Microsoft® Expression Blend 3, ASP.NET, SQL Server 2008, and ESRI ArcGIS Server JavaScript API]
Integral GIS, Inc.

4 people have recommended Linda

"Linda was fantastic -- conscientious, thorough, and thoughtful. I could always rely on her to do a great job."

— **Zimran Ahmed**, *Director Product, UX, Infospace*, managed Linda at Infospace

"I would like to give this recommendation for Linda. As a software developer at ArabiaGIS, I have known Linda for approximately one year. Linda has good personal and professional qualities that contribute positively to her team. Linda is a motivated team player with great team spirit. She is a fast learner and a hard worker and handles deadlines professionally. Linda has an academic background in Geographic Information Systems and experience in software development as a web developer and designer. She provides valuable artistic and technical skills to her team in design and implementation. I recommend Linda for her personal qualities, professional qualities and team spirit."

— **Saleem Badreddine**, *Software developer, ArabiaGIS*, worked directly with Linda at Integral GIS, Inc.

"I had the pleasure of working with Linda during a project at ArabiaGIS and i must say she is a dedicated, very creative developer going above and beyond to exceed the clients expectation. I really enjoyed working with Linda and found her very approachable and found her creative and fast thinking valuable to the success of the project."

— **Bruce Philp**, *Senior Consultant, Infusion Development*, worked directly with Linda at Integral GIS, Inc.

"Linda is not only an independent and strong perfectionist but also an inspiring people manager. It was a pleasure to work together with Linda, who was a highly motivated designer. Deadline oriented, self motivated, reliable and broad-minded team player with deep and practical background. Linda's learning curve is pretty quick. She picks things up rather quickly. Although extremely technically minded Linda has the ability to communicate with simple, friendly language with a great sense of humor. Always maintains very good relation with co-workers."

— **Hasan Jaffal**, *Software Developer, ArabiaGIS*, worked directly with Linda at Integral GIS, Inc.
